## Education

---

Asia Pacific University of Technology & Innovations

Achieving Bsc. (Hons) Software Engineering (Degree Level 1)

Fairway Technology

- Programming Basic Course, Nov. 19<sup>th</sup>, 2023
- Professional Web Developer Course, March. 3<sup>rd</sup>, 2024
- Rockstar Developer Course, July. 28<sup>th</sup>, 2024
- UI/UX Design, November, 2024

## Skills

---

**Frontend** - Java is the first language I studied before stepping into web development. I have learnt Functions of Frontend Marked-up Languages, such as, HTML, CSS, Javascript, and Frameworks: Bootstrap, TailwindCSS, Material UI, React, Next.js, and Motion. I am planning to study Three.js at the moment.

**Backend** - I had a hard time understanding Server-side codes, however, through self-studying and under the guidances of my lecturers from Fairway Technology, now I have a better understanding in Backend than Frontend, and I mastered Node.js, Express.js, PHP, Laravel, MongoDB, SQLite, and PrismaDB. AWS is on the list to study.

**Tools** - NPM is the first tool and the one I always use in almost every projects. Other than that, I have studied Docker, React Testing Library, and Github. Jest, PNPM, Fastify, and Java backend web development are on track of learning.

## Experience

---

Although, I have no experiences from workplaces due to lack of jobs back in my country, Myanmar, I have experiences in developing websites, and I made some personal creations on my own. You can see them on [my portfolio website](#).

## Volunteer Experience

---

### Myanmar National Blood Bank

Yangon

Donor Recruitment Coordinator

2025

- I have to remind donors that their appointed date of donating are coming up, and I had to make 500+ calls a day.
- Although, this is irrelevant to my coursework, the experience I got from this is priceless. As a person with no social interaction all the time, this acknowledges me that it is no hard thing to deal with people and contribute in teamworks.

## Interests

---

- **Technical:** I have created websites similar to real world. The language I mastered the most is Javascript.
- **Language:** English is my second most fluent language.
- **Interests:** I love listening to music to sooth my mind in my free time. I also have an interest in creating Softwares.
